PROFESSIONAL SUMMARY

Enthusiastic software developer with proficiency in JavaScript, React, Python, and Flask. Brings a decade of professional experience in the tech sector, including a significant role as a Product Manager at an e-commerce fulfillment startup acquired by Shopify. Demonstrates a strong passion for building innovative products and solving complex problems. Seeking to leverage technical skills in an engineering role.

TECHNICAL SKILLS

JavaScript | React | Python | Flask | SQL | TypeScript | Node.js with Express

TECHNICAL PROJECTS

Sprintr - [Github](#) | [YouTube Demo](#)

Full stack Agile project management tool with a unique auto-assignment feature (React, Python, Flask)

- Developed a task distribution system that matches tasks to users based on multiple criteria through algorithms.
- Implemented business logic to provide users with macro-level productivity metrics for each sprint.

RemindMe - [Github](#)

Full stack comprehensive reminder service (React, Node, Express, Mailgun)

- Implemented a user-friendly interface that allows users to quickly set reminders by entering their email address, the reminder subject, and the exact reminder time.
- Integrated Mailgun API to automate the dispatch of email reminders, ensuring timely notifications based on user-specified schedules.

Personal Portfolio Website - [Github](#) | [Link](#)

Comprehensive portfolio website documenting my transition from Product to Software Engineering (Next.js, Tailwind)

- Structured the site to highlight my professional journey, skills, and projects with extensive use of modular React components, enhancing site maintainability and scalability.

EXPERIENCE

Onetask.me

Software Engineer

Chicago, IL
February 2024 - Present

- Successfully migrated significant portion of existing JavaScript codebase to TypeScript.
- Received targeted mentorship, focusing on software architecture and scalable solutions, which significantly improved my technical and problem-solving skills.
- Actively collaborated with a team of developers and a senior mentor, enhancing skills in code review processes and version control using Git.

Deliverr Inc. (acquired by Shopify in July 2022)

Product Manager II

Chicago, IL
June 2019 - October 2023

- Owned end-to-end technological product roadmap and vision for Crossdock program (~97% of inbound volume)
- Launched a label-less inbound program, directly addressing customer feedback and market demand, by leveraging tech to significantly simplify shipping requirements for customers leading to 30% increase in volume.
- Significantly improved warehouse operational accuracy and efficiency through the creation and launch of proprietary technology such as: inbound pallet tracking + dashboard, dimension-and-weights program, and box deconsolidation.

Coyote Logistics

Operations Team Lead

Chicago, IL
June 2014 - June 2019
